

Requirement Analysis

Functional requirements

- The ticket form must need only Caller Name and Short Description from the student.
- A flow must trigger when a new ticket is created with an empty Category.
- The flow must evaluate the Short Description for predefined keywords.
- The flow must set Category and Subcategory according to the matched keyword.
- An email notification must be sent to the caller after classification.
- Subcategory choices must depend on the selected Category.

Keyword to classification rules

Keyword(s) in Short Description	Category	Subcategory
WiFi / Wi-Fi / Network	Network	Wi-Fi
Projector	Hardware	Projector
Password / Login	Access	Forgot Password
Slow / Hanging	Performance	Slow Computer

Non-functional requirements

- No-code and easy to maintain
- Accurate, consistent data
- Access control so only authorized users can view or change ticket data
